

Turf stock list

Botanical name	Common name	Description
Pennisetum clandestinum	Kikuyu Turf	Kikuyu is a warm season grass which performs best on well drained soils and the warmer climates of Northland. Kikuyu is a hard wearing grass that does not burn off during the summer. It is characterised by having underground runners (rhizomes) and above ground runners (stolons). It is resistant to diseases and most pests. Our roll out lawn is a quick and inexpensive solution for an instant lawn.

Other grass species can be grown to order.
